📍 Ronda Ponent 248,
Terrassa, Barcelona

Skills

- Java (Spring Boot)
- Javascript (React/Node.js)
- PHP (Laravel)
- SQL
- MongoDB
- HTML/CSS
- GIT
- DOCKER/ VAGRANT

Language

English(B2.1)

Spanish(native)

Catalan (native)

Other Formations

JavaScript Algorithms and Data Structures - FreeCodeCamp(Done)

Java Master Course - Udemy (In progress)

Education

-Scientific Baccalaureate, Mare de Déu del Carme, Terrassa.

-Computer Engineering (96 credits exceed),UAB

-Advanced Degree in Web Applications Development Nicolau Copérnic, Terrassa

Experience

Junior Full Stack Internship

2022 - 2023

ITNUBE CONSULTING S.L

Key Responsibilities and Achievements:

- PHP and WordPress Development:
 - I played a key role in PHP and WordPress development, creating dynamic and responsive web solutions. This included extensive work on WordPress projects, where I not only developed custom themes but also configured and customized various proprietary plugins specific to ITNUBE CONSULTING. This hands-on experience in plugin configuration allowed me to tailor the functionality of these plugins to meet the unique needs of our projects and clients.
- Web Layout and Design:
 - My role involved the implementation of visually appealing and user-friendly web layouts. Through hands-on experience in web design, I honed my abilities to create aesthetically pleasing interfaces that contribute to a positive user experience.
- Technical Support:
 - I provided technical support to end-users, addressing queries and resolving issues promptly. This experience enhanced my problem-solving skills and allowed me to communicate complex technical concepts in a clear and understandable manner.
- JavaFX Application Development:
 - Developed the accreditation management application for speakers at medical congresses from the ground up, utilizing JavaFX. Adhering to the MVC architecture, I ensured the application's efficiency and maintainability. Notably, the application not only facilitated the display of speaker information and registration on the platform but also enabled the printing of event accreditations by connecting to a laser label printer.
- JavaScript and jQuery Modification:
 - Extensively worked with JavaScript during the creation of image sliders and when modifying parts of the code within jQuery-based plugins. This involved hands-on experience in enhancing user interactivity and customizing functionalities to meet specific project requirements.
- Database Management (MySQL and SQLite):
 - Demonstrated proficiency in both MySQL and SQLite databases. Utilized these database systems to support various aspects of projects, including the accreditation management application. This included tasks such as database design, implementation, and management, contributing to a comprehensive understanding of data storage and retrieval.

Soft Skills

• Problem solving

• Code Optimization

• Flexibility

• Teamwork with Scrum
